Schedule your chemistry lab first since there is only one section of it. Build the rest of your schedule around it. If your math placement requires you to start with a lower math course than 165, start your math in the fall semester. If necessary, chemistry biochemistry majors can postpone BIOL 155/156 until their second or third year.

Scheduling of many general education courses such as the History, Humanities, Literature, Fine Arts, and Social Science electives as well as SPCH 101 and CMPS 130 is flexible. . For example, this schedule recommends a history elective in your first semester and a Fine Arts elective in your last semester, but you could switch them. Be sure to check the prerequisites for the course you want to take.

Total Hours for Degree **<u>120</u>**

Approved electives:
(1) Biology/Chemistry electives must total at least 10 hours. These hours must come from CHEM 451(2), BIOL 320 (4), BIOL 328 (3), BIOL 329 (2), BIOL 440 (3),or BIOL 441 (1) It is strongly recommended that CHEM 451 be one of the courses that you choose, especially if you plan to pursue an advanced degree.. One of these electives must be either CHEM 490 or CHEM 421. You may distribute these courses between the fall and spring semesters as you choose.

45-Hour Requirement. You are required to have at least 45 hours from courses at the 300 and 400 level. Required courses for this concentration include 44 hours at this level. To fulfill the 45 hour requirement, you must take a 300 or 400 level course as the second social sciences option. If you do not do this, you must take another 3 hours at this level.   You must also take 1 additional credit at 300+. Discuss this with your advisor before registering for the first semester of your senior year to be sure that you are meeting this requirement.
