Schedule your chemistry lab first since there is only one section of it. Build the rest of your schedule around it. If your math placement requires you to start with a lower math course than 165, start your math in the fall semester.

Scheduling of many general education courses such as the History, Humanities, Literature, Fine Arts, and Social Science electives as well as SPCH 101 and CMPS 130 is flexible. For example if there are no open sections of SPCH 101 in the spring of your sophomore year, you could take CMPS 130 then and take SPCH 101 later. Be sure to check the prerequisites for each course.

Schedule classes with only one section (e.g., PHYS 101, 102, 203 204, CHEM 221, 222, 300, 302) first. Avoid postponing Physics because that would push back when you can take Physical Chemistry and upper level chemistry courses and make it difficult to finish in four years.

**Approved electives:**

(1) Social and Behavioral Science electives must come from ECON, GEOG, GOVT, PSYC, or SOCI. Two courses are required. One must be at the 200 level or higher. Xavier requires either Introduction to sociology or psychology. If you intend to apply there, you should choose either PSYC 101 or SOCI 151 as your first social science elective. Both ULM and Xavier colleges of pharmacy require an economics course so we require ECON 211 as the second social science course.

**45-Hour Requirement.** You are required to have at least 45 hours from courses at the 300 and 400 level. Required courses for this concentration include 48 hours at this level. Discuss this with your advisor before registering for the first semester of your senior year to be sure that you are meeting this requirement. This program is designed for those who want to earn a BS degree in chemistry and prepare to enter a college of pharmacy. There are two colleges of pharmacy in Louisiana, UL-Monroe and Xavier. Students following this program will complete all courses required by ULM. Xavier has slightly different requirements. Discuss this with your advisor if you plan to apply there. By taking classes each summer, students may be able to complete pharmacy admission requirements in three years and BS requirements in three and a half years. See the academic advising sheet for "accelerated CHPH" for information on that.
