This is an interactive, hands-on workshop that covers the basics of multisensory structured language programs. Participants will learn techniques for remediating students with dyslexia in the areas of phonemic awareness, phonics, fluency, vocabulary, and comprehension.

Objectives

At the end of the workshop, participants will be able to:
1. Identify the characteristics of dyslexia and other related difficulties
2. Describe the components of a multisensory structured language program
3. Plan and conduct instruction utilizing multisensory structured language strategies for phonological awareness and phonics
4. Develop visualization skills to enhance reading comprehension in students
5. Identify and utilize strategies for teaching morphology
6. Identify and utilize strategies for developing written expression skills in students
7. Analyze and interpret students’ errors in reading and writing

Who should Attend?

- Regular Ed. Teachers
- Special Ed. Teachers
- Reading Specialists

What should Attendees Bring?

- Their favorite writing instrument
- Warm clothes, if bothered by the A/C
- All other materials will be provided
