

CAEP Annual Report – Accountability Measures

Initial Level - Candidate Competency at Completion

Teacher Work Sample

Overview: The Teacher Work Sample (TWS) is a teaching unit that allows residents to collect and analyze the learning data of PK-12 students during the full year of residency. In Residency I, candidates complete a version of this assignment twice with each university coordinator observation. In Residency I and II, they complete this process along with creating a student achievement chart and questions as a part of the POP Cycle

In Residency II, for the final assessment of their TWS, candidates are required to create a pre/post-test that will be presented to their students on the content of the unit. That data is compiled into a document along with data on the classroom, school, community, and students to create the TWS. The components of the TWS include Contextual Factors, Learning Goals, Assessment Plan, Design for Instruction, Analysis of Student Learning, Reflection and Self-Assessment, and the attachment of all lesson plans and materials. Candidates are assessed at the end of Residency II by their assigned university coordinator.

The TWS data provided is derived from a final assessment at the exit of the program during residency II and is based on a three-point scale: Target = 3, Acceptable = 2, and Unacceptable = 1. Each criterion is included below along with standard alignment and mean scores for the overall EPP as well as for each individual program. Based on the requirements set by the EPP, residents must have a 77% or higher on the TWS to complete residency. The mean scores for the EPP illustrate candidates exceeding this target for all criteria demonstrating candidate competency at completion based on contextual factors, learning goals, assessment planning, design for instruction, analysis of student learning, reflection, and self-assessment.
