

Food & Drink Limitation increase

The limitation on the dollar value of food and drink a public servant may accept increased from \$61 to **\$62 per public servant per event starting July 1, 2019**. As always, the dollar limitation does not include tax or gratuity, and public servants **must eat this food in the presence** of providers or their representatives. The provider is responsible for keeping track of how much has been spent, but public servants should reasonably be able to tell

whether the money being spent on them is above the Code limit.
